

# CONFIDENTIAL

MG/262

## SERVICE MEMORANDUM

3 July 1959

### IMPORTANT MODIFICATIONS

Parts List  
Amendment No.

Connecting  
rods

From Engine No. 1343 - 'MGA' Twin-Cam

PMG/347

To improve balance and to strengthen big-end

Connecting rod now provided with bosses at small end for balancing purposes; heavier big-end bearing caps introduced.

The new type are interchangeable with the earlier pattern IN SETS ONLY.

When fitting a single connecting rod of the later pattern to Engines after No.1343, no weighing is necessary (see Service Memorandum No. MG/252).

Thermostat

From Engine No. 1330 - Magnette (Mark III)

PMG/354

To improve operation of heater

Thermostat opening temperature increased to 70°C (was 65°C).

Interchangeable.
