Sheet No. 1.

No. Sheets 1.

M.G.A. Twin Cam.

Disc. Brakes.

For normal competition work and road racing, the standard brake pads which are "Ferodo V.G. 98" will be found suitable.

But for races of many hours duration, when extra long brake pad life is desired, it may be found desirable to fit harder pads, Pt. No. AHH 5977, which are made of "Ferodo D.S. 3" (Dunlop VBO 5138.A.).

This Ferodo D.S.3. brake pad material gives a relatively high coefficient of friction, and if used for normal road work, a very heavy pedal effort will result.
