

THE "CRESTA" MAGNETTE

Special Two-seater Model in Which Both Light Weight and Comfort Have Been Studied

A SPECIAL model of the M.G. Magnette, to be known as the "Cresta" Magnette, has just been placed on the market by the Cresta Motor Company, Ltd., of Worthing. The coachwork, which is shown in the accompanying photographs, has been carried out by E. Bertelli, Ltd., and the two-seater body is designed with a disappearing hood, an occasional seat, ample luggage accommodation, and a windscreen which, when in the raised position, has flanking screens that can be used as miniature windscreens when the main screen is horizontal. A cover is provided for the rear of the car and for the

passenger's seat when necessary, there is a very large tool box under the bonnet, an Ashby or a Bluemel steering wheel is available, the fuel tank holds 11½ gallons, the seats are adjustable for angle as well as for position, and the detail work of the car is carried out very well indeed, weight being kept down by the use of a special grade of aluminium panel. The finish of the upholstery and paintwork adds very greatly to the attractiveness of the car.

The "Cresta" Magnette has a handsome aluminium-panelled body with many excellent features.
